## 3 Flowers

<http://www.threeflowersessences.com>

The Columbia River Gorge contains a rich tapestry of healing medicines. I felt the spirits of the land and the native indigenous wildflowers 'calling' me to make medicine in sacred sites around The Gorge and on Mt. Hood. I could sense the deep history and sacredness of this land and the plants. I could hear the whispering of the native spirits. I felt like I was tapping into a long lost part of myself—one that walks in deep reverence of the Earth and this powerful place. These wildflowers offer their gifts to assist people in finding greater balance—emotionally, mentally, and spiritually. Flower essences are created vibrationally so no harvesting is necessary.

For the last several hundred years, holy oils have been all but hidden from the general population. Prior to this time, they were the top traded commodities along with gold and sometimes frankincense and myrrh were worth their weight in gold! This was due to their various applications from medicinal and cosmetic, to pest control. They were used abundantly as a spiritual medium to enhance a peaceful and prayerful state. This is the best of aromatherapy and the essence of the new millennium! Experience for yourself the healing power of Ancient Essense oils.

Bath and Body Bliss was born out of a love for handcrafted soaps. I discovered the benefits of these soaps while searching for something moisturizing for dry skin. I had lived most of my life in Wisconsin, and winters there are pretty brutal. Between the cold temperatures and winds, it can be so damaging to your skin. I found that by using handcrafted soap, I could keep dry and flaking skin much better under control.

Back in 1972 Belle Star found herself very short of cash. She knew there was a Swap Meet in her neighborhood so she decided to try to sell some homemade potpourri to augment her cash flow. Taking roses from her back yard she dried the petals and put them in the baby food jars currently being provided in large supply by her youngest son. She added some rose oil from the herb store and sprayed the jar tops with gold paint, tying a bit of green yarn around the neck for decoration. Putting the baby in his buggy and adding a card table, sheet and her new product, she walked on down to the Swap Meet and sold all 40 jars at a dollar apiece. That was the beginning of Belle Star Inc., a thriving business that is still in operation thirty years later.

We have been selling Swarovski crystals and beads since 1974. We have also added crystals from Asfour of Egypt and a line of pewter hanging pieces. We feel very fortunate to be in this business, to have such wonderful customers and to be able to look at such beauty every time we pack an order. One crystal prism or pendant is beautiful on its own, but when you see the different shapes and colors together it is a dazzling sight.

Earth Creates Art collection was inspired by my passion to respect the Earth that sustains all life as we know it. Life is able to thrive fully when we stop to remember how the Earth provides so much to us in every way possible from the air we breathe to the vegetation that nourishes us physically and spiritually. Mother Earth speaks to us in many forms and ways. It has been my greatest pleasure to capture some of that wisdom and spirituality in photographs I have taken during my travels.

Each rune is named for a woman in history and the book contains a biographical paragraph about her. The book contains layouts and how to interpret them, excerpts from women's writings and song lyrics, a history of the conception of the runic designs and a bibliography containing references for at least two books covering the topics addressed by the runes.

The ScentBall and CarScenter aromatherapy diffusers were developed by Earth Solutions in collaboration with Hubmar in 1995 and 1997. We were the pioneers that offered a natural plant-derived aroma alternative to an industry of artificial fragrances. On the heels of that and with the creative genius of folk artist Eric Legge, Earth Solutions took on a new look. The collection of 5 Scent Inhalers grew to twenty and became our best all time and ongoing product. The convenience and concept of affirmations associated with scents in a pocket sized inhaler was a hit.

Enchanted World of Boxes was founded by two Bohemians who were dreaming how they can make the world a better place. Teresa Witkowska was an artist, freshly graduated from the Academy of Fine Art in Krakow. Chris Kowalski, her husband, was an everlasting student trying to uncover the secrets of the universe in various academic disciplines and at different universities. In 1989, when the company was founded, Teresa was painting beautiful oils on canvas and Chris was PhD student at the Department of Anthropology at Harvard. And one day, after many tries, they discovered the existence of a parallel universe, where hard work and a lot of creativity can actually pay the bills and make other people happy. This parallel universe was called Enchanted

World of Boxes.

Fred, like a fine chef, has perfected the art of blending and preparing his incense. The incense making process is an intricate one that can take up to four weeks or longer for each batch. Fred's incense is dipped many times into the resins and oils. It is then sprinkled with the herbs and/or powders and then dried. The manual labor is intensive but worth it. Designed to be burned in a horizontal, rather than vertical position, each stick of Fred Soll's® will burn from 1 to 2 ½ hours, depending on the scent. Fred refuses to compromise his standards, buying only the highest quality pure resins, herbs, powders, and oils.

Later, she discovered that the images balanced her brain as a result of the symmetrical compositions. She realized that if the art's regenerative properties worked for her, then it could heal others as well.

Himalayan Bowls was founded in San Francisco, California in the year 2001. In the late 1990's, I began collecting antique singing bowls purely out of love for the sound. A lifelong musician, I was completely captivated by the amazing sound of the singing bowls and started my large collection. At the time I was a university teacher and had no intention of starting a business. My personal collection grew and grew. After some time, I had bought so many that I decided to sell some that I was no longer using.

Nestled in the foothills of the Rocky Mountains, the Artisans at the Studios led by husband and wife team, Curtis & Sheron, strive to create contemporary works which are mindful of the beauty in the world around them. Their creative philosophies combine a desire to express, rather than cover, the human form—emphasizing natural beauty rather than over-polished, sterile objects.

The resulting artworks made with recycled and reclaimed metals take on an organic, earthy sophistication giving the materials a voice in the artwork they become and the wearer their own expression.

Indochine first opened its doors as a small retail shop in Boulder, Colorado in 1995. Owner Hugo Brooks saw a need for quality Asian furniture, antiques and hand-crafted items at affordable prices. So he called on his many years' experience doing business in Asia and became a direct importer. By traveling to Asia and the Pacific Rim countries, meeting the traders and craftsmen directly, and purchasing directly, he personally ensures the quality and authenticity of purchases. He has eliminated the middlemen and their added costs, and is pleased to pass these savings on to customers. He is always available to work directly with customers and will search for just the piece you are looking for.

The science represented in the "Ring" technology is both ancient and modern. The so-called sacred or royal cubit length of 20.6 inches is the controlling factor in the construction. From the works of John Archibald Wheeler, the term Tensor, and its description as being formed when the ends of a piece of wire are joined in a loop, links the ring technology to modern advanced physics. At the time of Wheeler's writing, there was no known application for the Tensor except as a mathematical theory.

Some pieces, such as Aphrodite, Shakti and Changer are visionary, that is, I see them in my mind first. They work as affirmations or visualizations, usually qualities I want more of in my life. Others, like Raven, Cerridwen and Vrksasana are attempts to capture an essence that amazes me in people I know and love. The pendant designs come from a tendency towards simplicity and non representational art and noticing the diversity and similarities of spirit amongst humans.

I make all my own work, Sterling silver, 14K Gold, recycled copper, and bronze. I incorporate recycled Sterling silver & Copper at every opportunity. I use casting, etching, hammered stamping, and enameling to makes my work the unique mix that it is. Using mostly cold connections, I connect metal with rivets and other joinery that lets the design follow function. After a lengthy hiatus, I have picked up the torch so I can add stones and have started casting which has added new dimensions to my work. Most of my work is limited edition or one of a kind and I do take custom orders.

The designs of exalted holy places from the prehistoric monuments at Stonehenge and the Pyramid of Khufu at Giza, to the world's great cathedrals, mosques, and temples are based on these same principles of sacred geometry. As far back as Greek Mystery schools 2500 years ago it was taught that there are five perfect 3-dimensional forms - the tetrahedron, hexahedron, octahedron, dodecahedron, and icosahedron ... collectively known as the Platonic Solids; and that these form the foundation of everything in the physical world. SACRED-GEOMETRY.COM is dedicated to bringing the power of sacred geometry and the wonderfully patterned beauty of Creation, to your life.

For over 5000 years, the use of natural plant extracts to blend fragrance has been a cultural tradition of our home in Auroville, South India. Our neighboring city, Pondicherry, was formerly a French trading colony supplying European perfume makers. Incense production and naturopathic herbal healing have been a way of life here for generations and is now world renowned. Maroma has utilized this rich cultural background and combined it with a very contemporary commitment to Earth-friendly product content and environmentally responsible manufacturing practices. As a result, we've created a truly superior and diverse range of eco-friendly products from soaps, bath salts, and perfume oils, to incense, sachets and luminary candles. Maroma's unparalleled blending of perfectly balanced natural aromatics infuses each of these products with a fresh and fragrant breath of unity.

Specifically on my website, please check out my most recent oil painting series, Chakra Rainbow. Chakra Rainbow is a series of fifteen 36" x 36" full figure oil paintings which depicts states of balance and imbalance of the Chakra Energy System. Largely based on archetypes and goddess influence, this series is my way of bringing a sense of visibility in realism to the mainly abstract and invisible concepts of chakra theory. Each painting illustrates a different chakra, its elements and associated symbolism.

Starwest Botanicals

161 Main Ave.

Sacramento, CA 95838

1-800-800-4372

<http://www.starwest-botanicals.com>

Starwest Botanicals started as a small retail herb shop in 1975 in Sacramento, California. When we made the decision to begin selling herbs wholesale, we were faced with competition from more-established herb companies. We felt that our best chance to compete was to focus on selling a higher quality of herbs at good prices. Saying that you sell quality herbs sounds rather quaint, as most companies say they sell quality - we knew better. As I hit the road with my sample bag, I could demonstrate to the store buyers that our quality really was better, at equal or just slightly higher prices. Most stores I visited "got it." They knew that their business would prosper if they carried herbs that were fresh, potent, and worked for the purpose intended.

Tempest in a Teapot is a combination of talents between long time friends and partners, Barbara C. Ryan and Elsa M. Mikus. Elsa has been actively involved in artistic endeavors her whole life and has participated in juried craft shows since 1990. She retired from AT&T in 1999 to pursue her creative talents on a full time basis. In 2001, Barbara retired from Avaya. As she was casting about for a new career, friends decided that they too wanted to retire and offered to teach Barbara their techniques for making wind chimes from recycled, vintage silver plate teapots and flatware. Wanting to take her life in a new and creative direction, Barbara eagerly accepted their offer and in September 2001, Tempest in a Teapot was born.

Tibetan Spirit is also committed to supporting the rapidly vanishing institution of small, traditional, and often family-based artisans in Nepal and India. In our travels to Nepal, we have been saddened to learn about the great number of Nepali artisans who have been enticed to neighboring countries to teach their traditional skills and expertise to corporations. Such corporations are engaged in the mass production of Tibetan Buddhist art and ritual-objects in hopes of profiting from the growing market for these traditional goods. We continue our support of the artisan even as increasing pressure from rapid globalization erodes the sustainability of such businesses. With your support, patience, and goodwill, Tibetan Spirit has been able to stay in business while keeping our prices low and operating based on Dharma principles.

After leaving Steven's birth country of New Zealand, the couple traveled extensively throughout Asia where their love and appreciation of the region's silver adornments began. They returned to Hawaii with their "discoveries" and opened a street cart within steps of the Pacific Ocean. It was from this small cart that they unexpectedly began establishing wholesale accounts on the mainland with visiting tourists.

Très Spa soap is made in small batches that are carefully watched and tended to every step of the way. Très Spa soap is hand poured into handcrafted soap molds that create a truly uniquely shaped bar in the end. We use minimal packaging and the wrapper used to package your soap bar is made from 100% post consumer paper that is also made by Très Spa and naturally colored. The Tsa Tsa Studio's purpose as a center is to provide training in and facilities for tsa tsa practice and other forms of sacred art. 'Tsa Tsa' is a Tibetan term used to describe Buddha statues and relief images that are made as part of a particular meditation practice. Making tsa tsas is a preliminary practice given by teachers in Tibet - and now all over the world - to their students as a method of eliminating obstacles, purifying negativities, and creating positive energy (merit). Often, students are given a commitment to make 100,000 tsa tsas during their lifetime.

Unique Gift Solutions came to fruition out of necessity. After looking for something very specific and wanting it to be handmade in the US, I simply could not find it, so I made what I had pictured in my mind. Something beautiful that speaks to the soul, can be enjoyed in a sunny window throwing off magnificent rainbows or outside gently swaying in the breeze. Each component of the Charm Catcher was for a specific purpose, Friendship Balls, Charms, pewter suncatcher and simply dazzling crystals and beads. And so - Charm Catchers were born in my Rivers Edge Studio in De Soto WI. My 2 dogs, Josie and Jenna and especially my 4 cats, PJ, Cloudy Girl, Cloudy Boy and Callie the calico are always willing to lend a not so welcome hand, if they are not snoozing!.

Our handstamped jewelry is unique and designed to warm your heart with simple sentimental messages. Each piece is handmade from scratch in our studio. We sculpt the original of every charm, wrap every pearl, and handstamp each letter making them imperfectly perfect. Our wholesale charms are made with various materials (including fine pewter, white bronze, yellow bronze, and sterling silver). They are antiqued to a soft vintage finish and freshwater pearls are added to our creations. Our pieces are only made with quality materials and will last for many years!

At first Alicia was skeptical. But when she began to learn about horoscopes, she found that once you got past the blurbs in the newspaper, there actually really was some truth to it. And when she began making the jewelry, stories flooded in about all the magical and powerful things that happened to the women and men who wore them. Many years and thousands of necklaces and bracelets later, Alicia's "Meaningful Bling" is sold at the Smithsonian Institute, has been featured in a dozen magazines, and has been seen on the necks of Hollywood celebrities. Wandering Star is a true example of what it means to be "Made in USA." Each piece is made to order by artisans in Portland, OR. Your dollars go straight to our employees, not to CEOs or overseas

Here's the technology behind the Wellness Pendants, as we understand it. They are put into chambers, and inundated with certain specific frequencies which resonate with the biofield of the body. When they are removed from the chamber, the molecules of the pendant retain the frequency, so as it's brought in proximity to the body, it resonates and creates balance. The Ground and Flow differ as follows: The ground has 4 stones - tourmaline, germanium, and mixed minerals. The flow has germanium and 2 north-pointed magnets. For most people, wearing a Wellness Pendant translates into feeling more energized and being more focused.

Zoë de Negri is an astounding jeweler who creates one-of-a-kind original designs over and over again. That is to say, no piece is exactly alike, but is hand-crafted and follows the flow of the unique stones and the silver. She uses a variety of intuitive stones that resonate with her and her clients. The stones speak to her, tell her what to fashion out of their essence. Clients are often drawn to a particular piece because the stone will call them personally; stones like Tibetan turquoise, ancient amber, onyx, amethyst, druzy quartz, crystal, tourmaline and so much more.

The buddha pendant has words of inspiration written across the front and back: "Compassion, Karma, Peace, Love, Kindness, Respect and Tranquility" - words to live by. The Herbivore pendant speaks out for Vegetarians, Vegans and Animals alike.
